SUMMARY

Senior Software Engineer and Technical Lead with 9+ years of professional experience designing, building, and shipping scalable production systems across web, mobile, and cross-platform applications. Technical lead and architect of the S. Chand Publication LMS, an online and offline learning platform running on mobile, Windows, Linux, and TV, built on AWS and delivered with a team of 8. Senior Full Stack Developer with deep experience in JavaScript, TypeScript, React.js, Next.js, Node.js, and MongoDB, plus hands-on work in microservices, cloud-native architecture, real-time systems, authentication and security, CI/CD, and OpenAI-powered applications.

- **9+ years** of professional software engineering, from MERN developer to Senior Software Engineer and Technical Lead
- **Architecture and leadership:** technical lead and architect for a production LMS with a team of 8 (Flutter, Node.js, MongoDB, Elasticsearch, AWS)
- **Offline and LAN-based systems:** native Windows, Linux, and TV applications for local-network learning environments
- **AI applications:** integrated OpenAI APIs in two products (Spritz, CareerMocha)

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, HTML5, CSS/SCSS, PHP

Frontend: React.js, Next.js, Angular, Flutter, Tailwind CSS, Bootstrap, jQuery

Backend: Node.js, Express.js, Hapi.js, FastAPI, Laravel, REST API design, Microservices, WebSockets, Socket.io, RabbitMQ

Databases & Search: MongoDB, MySQL, Elasticsearch

Cloud & DevOps: AWS (Lambda, SQS, SES, S3, IAM, Cognito, CloudWatch, EventBridge), Docker, Terraform, CircleCI, CI/CD

Security & Authentication: Auth0, AWS Cognito, JWT, Role-Based Access Control (RBAC)

AI: OpenAI APIs, AI-powered applications

Testing & Tools: Jest (unit testing), Playwright (end-to-end testing), Git, Postman, Swagger, Jira, ZenHub, Stripe, SendGrid, Mux

Architecture & Leadership: Software Architecture, System Design, Microservice Architecture, Cloud-Native Architecture, Technical Leadership, Mentoring, Agile Development

PROFESSIONAL EXPERIENCE

Incaendo Technologies Pvt. Ltd., Noida, UP

Mar 2020 – Present

Senior Software Engineer / Technical Lead

- Provide senior-level full-stack development, architecture, and technical leadership across eight product platforms in EdTech, AI, media, gaming, and marketplace domains, working in teams of 2 to 10 engineers.
- Lead, mentor, and manage an 8-person team as Technical Lead and Architect on the S. Chand Publication LMS, delivering online, offline, and LAN-based learning across mobile, Windows, Linux, and TV.
- Design and build scalable, microservice-based, real-time backends with Node.js (Hapi.js, Express.js), MongoDB, Elasticsearch, Socket.io, and AWS (Lambda, SQS, SES, S3, Cognito, EventBridge).
- Implement authentication and authorization with Auth0, AWS Cognito, JWT, and RBAC, including a standalone identity microservice.
- Integrate OpenAI APIs into two AI-powered products, building AI agents and personalized feedback features.

Trihund Solutions Pvt. Ltd., Gurugram, HR

Apr 2019 – Feb 2020

MEAN Stack Developer

- Led development of a multi-level task management system using Angular 7, PHP (Kohana), and RabbitMQ, improving task processing time by 25%.
- Built a secure real-time internal chat platform, reducing message delivery time by 30%.
- Developed a CRM system for tracking leads and user activity, increasing operational efficiency by 20%.

Ragvim Technologies Pvt. Ltd., Noida, UP

Mar 2017 – Dec 2018

Full Stack Developer

- Built a fitness studio management system with Laravel 5.2, improving scheduling accuracy by 30%. Live: epicfitstudios.com
- Developed an online test platform with automated video assessments, reducing manual review time by 40%.

SELECTED PROJECTS

S. Chand Publication LMS (S. Chand Prism) | Technical Lead / Architect | Team of 8

Live: [S. Chand Prism](#) | Android: [Google Play](#) | iOS: [App Store](#)

Learning management system for schools that brings digital books, classroom management, online assessments, question paper creation, student performance reports, and teacher-student collaboration onto one platform.

- Architected and led the cross-platform LMS spanning mobile, Windows, Linux, and TV with both online and offline learning; led, mentored, and managed a team of 8.
- Built native Windows, Linux, and TV applications for offline learning, including Windows LAN and Linux LAN deployments that support local-network learning environments.
- Built with Flutter, Node.js, MongoDB, and Elasticsearch on AWS (SQS, SES, IAM, Lambda, Cognito, CloudWatch, S3, EventBridge); optimized AWS services for secure data handling, improving content delivery efficiency by 40%.
- Shipped to production on the web, Google Play, and the Apple App Store.

Spritz (AI-Powered Platform) | Senior Full-Stack Developer | Team of 6

Live: [Spritz](#)

- Spearheaded the integration of OpenAI APIs, enabling AI-driven agents to carry out real-time interactions and increasing platform efficiency by 35% through AI optimization. Stack: TypeScript, Next.js, Hapi.js, Python, FastAPI, AWS SQS, SendGrid.

CareerMocha (AI Job Assistance) | Senior Full-Stack Developer | Team of 4

- Developed an OpenAI-based career platform that gives personalized feedback on resumes and job applications, improving candidate placement success by 20%. Stack: TypeScript, Next.js, WebSockets, Auth0.

Player State (Gaming Platform) | Senior Full-Stack Developer | Team of 10

- Led development of a platform where content creators take part in studio-hosted challenges, increasing user engagement by 30%; used AWS Lambda for dynamic scaling. Stack: Next.js, Hapi.js, MongoDB, Elasticsearch, Socket.io, AWS SQS, Mux.

Smash (Film & TV Pitch Platform) | Senior Full-Stack Developer | Team of 6

Live: [Smash](#)

IP matchmaking platform where creators build pitches that protect their ideas and get them in front of streamers, broadcasters, and studios searching for new projects.

- Built the workflow for filmmakers to upload detailed project information and create snapshots of project versions to share with producers; reduced project delivery time by 25% through pipeline automation. Stack: Next.js, Hapi.js, MongoDB, Socket.io, CircleCI, Auth0, Stripe, CKEditor5.

The Seam (Repair Marketplace) | Senior Full-Stack Developer | Team of 3

Live: [The Seam](#)

UK-wide marketplace for specialist clothing, footwear, and handbag repair, alteration, and restoration, matching customers with skilled Makers.

- Built the platform connecting users with specialist Makers, including a secure booking and chat system for communication and transaction handling. Stack: Next.js, Hapi.js, MongoDB, AWS Lambda, Socket.io, CircleCI, Auth0.

User Identity Manager (Authentication Microservice) | Full-Stack Developer | Team of 2

- Architected a microservice for user authentication and authorization using Auth0 roles and JWT tokens, improving authentication speed by 40% and strengthening security. Stack: React.js, Hapi.js, MongoDB, Elasticsearch, Socket.io, Swagger.

Station (Founder-Investor Platform) | Full-Stack Developer | Team of 3

- Developed a platform where company founders create and share profiles with investors, with real-time communication between founders and interested investors. Stack: Next.js, Hapi.js, MongoDB, CircleCI, Auth0.

EDUCATION

Galgotias University, Greater Noida

2014 – 2017

Bachelor of Technology (B.Tech), Computer Science & Engineering | CGPA: 8.62 / 10

CERTIFICATIONS

[Udemy Node.js Certification](#) | [Udemy Flutter Certification](#)

Languages: English (Fluent), Hindi (Fluent)
